Clearances can be reduced with chiefding acceptable to local authorities. Reduced installation must comply									

with NEPA 211 or CAN/CSA-B365

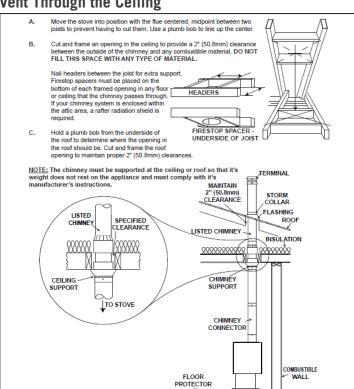

Clearances are unable to be reduced for the 1150 by using double wall pipe

ALCOVE INSTALLATION

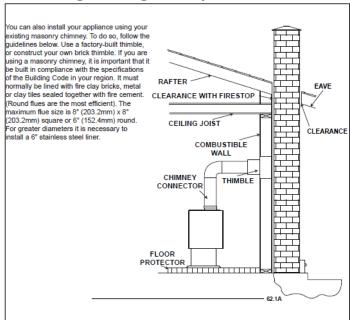

1100 series only may be installed, using a listed double wall connector, such as Security DL6 in Canada, the Simpson Duravent Plus DVL in the USA or an equivalent double wall connector, into an alcove having depth of no more than 4 feet and a height of at least 7 feet. The minimum clearances are as shown.

Vent Through the Ceiling

Vent Through Existing Masonry

Vent Through the Wall

If possible, design the installation so that the connector does not pass through a combustible wall. If during your installation you must pass through a combustible wall, check with your building inspector before you begin. Also check with the chimney connector manufacturer for any specific requirements. Consult with your dealer regarding special connection components available for use for wall pass-throughs. Use only parts that have been tested and listed for use in a wall pass-through.
