Extinguishing mediocrity online since 1999

heatilator®

The first name in fireplaces

Fireplace Guide

**In 1927, Charles
Lindbergh flew
across the Atlantic**

and Heatilator
introduced the first
factory-built air
circulating fireplace.

This revolutionary product forever changed the industry and enabled more consumers to have a fireplace in their homes.

For more than 85 years, Heatilator has remained true to its roots. Today, a full line of well-crafted hearth products provide value to homeowners in a broad range of design choices. Heatilator remains the most preferred and installed brand by building professionals—a testament to the unyielding quality and trust behind the Heatilator name.

OUTDOOR GAS

seamless contemporary style,
designed and built to live outdoors.

Palazzo

The Palazzo is a new kind of outdoor fireplace – a linear design with a clean look that provides a contemporary focal point in an outdoor setting. This eye-catching fireplace is tough, built with marine grade stainless steel that is rust-resistant even in the harshest conditions. A tempered glass wind guard keeps the flames full and lively, while an industry-first Power Screen provides safety.

OUTDOOR GAS

extend your outdoor living season

Carolina

The Carolina's compact footprint offers versatile installation opportunities. And this attractive unit is packed with advanced technology, like the IntelliFire™ Plus auto-ignition system and FireBrick technology for up to 25% more radiant heat. Now you can extend your outdoor living season with style.

Twilight II

Add warmth and beauty to two spaces—with one fireplace. The Twilight II is the world's first see-through indoor/outdoor gas fireplace. Enjoy the fire all year long, and from either side. An advanced design exceeds both window and gas fireplace standards, and rugged construction ensures impressive, consistent performance.

the original see-through
indoor/outdoor gas fireplace

OUTDOOR GAS

Twilight Modern

Bolster your favorite room and upgrade your outdoor living space. The Twilight Modern is an evolution of the industry's first indoor/outdoor see-through fireplace, and delivers impressive fireside views whether relaxing inside or socializing outside with no venting required.

indoor/outdoor
evolution

Dakota

The Dakota artfully blends style, function and utility with outdoor living. A rugged design loaded with advanced technology make the Dakota an enticing outdoor fireplace for years to come.

rugged
outdoor design

Villa Gas

The Villa Gas is a versatile outdoor gas fireplace at a value price. This compact unit can easily be installed on decks or patios. A stainless steel surround withstands the elements, and complements an outdoor kitchen or contemporary living space.

compact and
easy to install

Villawood

The Villawood is a wood burning fireplace at home in a variety of outdoor spaces. Upgrade your outdoor kitchen, or enhance your living area with style and warmth. Attractive stainless steel surround helps accent your décor.

enhance your living area
with style

Castlewood

The Castlewood turns any outdoor area into a welcoming and relaxing living space. A large, high opening provides a dramatic view from across the yard, and a textured brick interior offers masonry-style looks at a fraction of the cost.

dramatic views

Montana

The Montana is the original outdoor fireplace that started it all. It's fashionably built to withstand adverse weather conditions and deliver solid performance—season after season, year after year.

built to last,
season after season after season

Heatilator Key Technologies

Direct Vent Technology With Direct Vent fireplaces and inserts, 100% of combustion exhaust and fumes are removed from your home. These sealed fireplaces provide optimal heat, conserve energy and ensure clean, safe indoor air quality.

IntelliFire™ Ignition System The IntelliFire™ Ignition System (IPI) is an advanced intermittent pilot ignition system. IPI constantly monitors ignition, ensures safe functioning and conserves up to \$10/month in energy costs.

IntelliFire™ Plus Ignition System IntelliFire™ Plus (IPI Plus) takes this technology to the next level with more safety and memory settings and a programmable wireless remote control.

Heat Zone Technology Draws heat into another room of the home, up to 20 feet away. When a heat zone kit is run continuously, it will redirect up to 25% of the fireplace's heat to another area, thus reducing wall temperatures above the fireplace.

Heat Duct Technology Brings the warmth from your fireplace to the rest of your home, by redistributing heat from the fireplace via the furnace ductwork. When a heat duct kit is run continuously, it will redirect up to 25% of the fireplace's heat to another area, thus reducing wall temperatures above the fireplace.

Razor™ Burner The patented Razor™ burner funnels the flame through a burner consisting of two pieces of premium glass or metal. The result is an ultraslim fire with a distinct, elevated flame.
