COLLECTION

Shoreline™ shown with small four-sided surround

Large flames and huge viewing area

Hidden side control panel

Highly detailed log set

Extruded surround for a custom look

■ With a remarkably large viewing area, a gorgeous built-in look and high-efficiency heat output, the Shoreline™ direct-vent gas fireplace insert provides warm atmosphere for your home. With the largest viewing area in its class, the Shoreline gives you an unparalleled view of the fire. The hand-painted ceramic log set is cast from real wood, giving it a level of detail that is matched only in nature, and a unique tilted-burner design allows for natural distribution of the flames for an amazingly realistic burn. To meet your heating needs, the Shoreline is available with either 33,000 or 40,000 BTUs and a convection blower that distributes warmth into your living space. ■

CUSTOMIZE TO YOUR TASTE

The Shoreline™ is designed to give you the ultimate in creative freedom. With heating options and a variety of design and convenience features, you can customize the Shoreline to reflect your lifestyle and the style of your home. Choose from the following options:

STEP 1: CHOOSE YOUR BTU LEVEL

The Shoreline is available with two heating options: up to 33,000 BTUs or 40,000 BTUs. To determine which option best suits your needs, match the square footage of your living area with the option listed below.

STEP 2: CHOOSE YOUR SURROUND

With two available surround sizes, the Shoreline will fit most fireplace openings. Both sizes are also available with three or four sides, depending on your style preference and installation needs.

Large three-sided surround
28" x 41"

Large four-sided surround
33-1/2" x 41"

Small three-sided surround
25-7/8" x 36-5/8"

Small four-sided surround
29-3/16" x 36-5/8"

STEP 3: CHOOSE YOUR LINER

The interior liner can change the overall presentation of your fireplace insert. You can choose from three distinctive patterns to help create the perfect look and feel.

Tan Brick

Red Brick

Architectural Stone

*Square-foot heating capacities are approximations only. Local conditions, such as elevation, wind, vent configuration and choice of fuel will affect overall appearance of the fire and heating performance. Performance can also vary with home design and insulation, climate, condition and type of fuel used, appliance location, burn rate, accessories chosen, chimney installation and how the appliance is operated.

STANDARD FEATURES

33,000- or 40,000-BTU output and 155-CFM convection blower to circulate heat

Large viewing area of more than 490 sq. in. for enjoyment anywhere in the room

Unique design with hidden side-mounted controls for a seamless look

Aluminum surround offers a custom built-in fireplace look and makes installation quick and easy

Installs into an average 36" x 16" x 21" factory-built fireplace opening

Angled burner design extends down to the hearth for a true fireplace look and delivers large, natural-looking flames

50% turndown valve allows for adjustable heat and flame height

Limited Lifetime Warranty

Backed by the Good Housekeeping Seal

OPTIONAL ACCESSORIES

Remote thermostat

Wall-mounted thermostat

LP conversion kit

Barrier screen

STEP 4: CHOOSE YOUR THERMOSTAT

Adjust the comfort level of your room with a convenient wall-mounted thermostat or a versatile remote thermostat.

STEP 5: BARRIER SCREEN

The barrier screen attaches directly to the front of the fireplace insert and helps prevent direct contact with hot glass.
